MEMORANDUM

July 2019
Project No. 130116-043

SUBJECT: Demonstration for 60-Day Extension – Corrective Measures Assessment (CMA)
AES Ohio Generation, LLC (AES)
Ash Pond
Killen Electric Generation Station - Manchester, Ohio

Pursuant to CFR Title 40 Chapter 257 Subpart D §257.96(a) (CCR Rule), I certify that AES has demonstrated the need for an additional 60 days beyond the regulatory time period of 90 days to complete the assessment of corrective measures for the Killen Ash Pond due to site-specific conditions and the evaluation of remedial treatment alternatives in support of an informed CMA process.

In the case of the assessment for the Ash Pond, the site has complex hydrogeology and nature and extent (N&E) investigations are ongoing in support of the CMA process. Nature and extent information is an important component of the CMA. AES is also in the process of reviewing possible groundwater remedies and is evaluating potential closure strategies as well as implementation of critical steps in the groundwater treatment and remedy assessment process. Based on these site-specific conditions and related groundwater treatment alternatives evaluations in support of the CMA by AES, a 60-day extension is needed to complete the CMA process.

This certification as submitted, is to the best of my knowledge, accurate and complete.

Signed:  _____
